**SUBJECT: *Proposed Lateral Locations – Area 11, Phase-V Annexation; Reference  
Pin No. «Pin\_No» «Situs1» «Situs2»***

Dear «Sal» «Last»:

Moorman, Kizer, & Reitzel, Inc., PWC's consulting engineering firm for Area-11, has completed its preliminary design and layout for sanitary sewer in your neighborhood. The location of the proposed sanitary sewer lateral to serve the above referenced property has been marked on the street curb and indicated in orange paint as S/L. Adjacent to each S/L lateral marking is an identifying number for that specific lateral.

Lateral placements were established based on field observations of the property and what would appear to be the most likely location of your septic tank. Consideration was also given to visible obstructions such as driveways, walkways, etc. In that the location of septic tanks on each individual parcel could not readily be confirmed, we ask that you please review the lateral location with your prospective plumber to verify that the lateral location as marked will work.

If you prefer for the lateral as marked to be marked in a different location along the perimeter of the property, or you would like to review the location with the consulting engineer prior to its installation, please contact David E. Vaughn, PE, PLS, with Moorman, Kizer, & Reitzel, Inc. at (910) 484-5191. Mr. Vaughn will schedule a time convenient for you to meet with a representative between the hours of 8 a.m. and 5 p.m. Monday through Thursday, or Friday 8 a.m. to 11:30 a.m.

We appreciate your cooperation in this matter and look forward to providing sewer service to the community.

Very truly yours,

*gb* **PUBLIC WORKS COMMISSION**
