

**LARGE POWER SERVICE-COINCIDENT PEAK**

**AVAILABILITY** Available throughout the territory served by the Fayetteville Public Works Commission (“PWC”) in accordance with PWC’s Service Regulations and Charges for over 1,000 kW but less than 10,000 kW. This Schedule CPP is available only to existing PWC Customers receiving service on this Schedule as of October 14, 2022, and each such Customer will be billed on this Schedule until the earlier of the following: (a) this Schedule is terminated or amended by PWC; (b) the Customer requests another available schedule for which the Customer qualifies; or (c) PWC's review of the Customer's electricity consumption history indicates the Customer should or must move to another available schedule. This Schedule CPP is closed to any Customer that initiates Large Power Service with PWC on or after October 14, 2022.

**APPLICABILITY** Applicable to electric service used for nonresidential purposes where the demand exceeds 1,000 kW, at least three (3) or more months in a calendar year, but is less than 10,000 kW; provided, however, if PWC determines that the existing configuration of its transmission and distribution system necessitates, for economic or technical reasons, connection of a Customer with a demand of less than 10,000 kW directly from PWC’s existing transmission lines of 66,000 volts or higher, PWC may require the Customer to instead take electric service on the Large Power Service-Noncoincident Differential-Owning Transmission rate schedule. Demand, for purposes of determining the applicability of this rate schedule, shall be computed on the basis of the aggregate demand measured by the billing meter installed by PWC at the point of delivery for the Customer and the non-billing meter installed by PWC on the Customer’s side of the point of delivery to measure the output of all customer-owned generation, including but not limited to peak shaving generation and generation from qualifying facilities, but excluding generation used solely for emergencies in compliance with the operational limitations and emissions limitations established by the applicable North Carolina Department of Environmental Quality air permit.

**CHARACTER OF SERVICE** Service shall be three-phase, sixty hertz alternating current at PWC's standard available voltages except as provided for in the Service Regulations and Charges. Service shall be provided at a single point of delivery through one meter.

**DEFINITIONS**

- A. System Coincident Peak (CP) Demand** shall be the Customer’s average kW demand on PWC’s system measured during the same 60-minute interval used in the relevant month to determine PWC’s Coincident Peak Demand in accordance with the Tenth Amended and Restated Power Supply Coordination Agreement between PWC and Duke Energy Progress (DEP), as amended (PSCA), which may be adjusted from time to time by DEP.
- B. Customer Peak Demand** shall be the greater of: (a) the Customer’s highest 15-minute demand recorded during the relevant month; or (b) of the Customer’s contracted demand.

**LARGE POWER SERVICE-COINCIDENT PEAK**

(continued)

- C. **System CP Demand Cost** is defined as the Monthly Capacity Rate charged by DEP to PWC in accordance with the PSCA for the relevant month, which rate is estimated by DEP and remains subject to true up and adjustment in accordance with the PSCA.
- D. **Transmission Cost** is defined as the aggregate Transmission Rate per kW and the Ancillary Service Charge per kW for each of the Ancillary Services billed by DEP to PWC in accordance with DEP’s Open Access Transmission Tariff, as amended (OATT) for the relevant month, which rate is estimated by DEP and remains subject to true up and adjustment in accordance with the OATT.
- E. **System Loss Factor** is defined as the percentage computed as follows:  

$$\frac{\text{(Purchases from Electricity Suppliers - Sales to Ultimate Consumers)}}{\text{(Purchases from Electricity Suppliers)}}$$
 Purchases from Electricity Suppliers and Sales to Ultimate Consumers shall be derived from PWC’s most recently submitted Schedule 2, Part B of PWC’s U.S. Energy Information Agency EIA-861 Annual Electric Power Industry Report that precedes the relevant month, which amounts remain subject to true up and periodic adjustment in accordance with Federal Regulations.
- F. **Ancillary Credits** is defined as the total amount that is estimated and credited by DEP to PWC pursuant to the PSCA for any charges incurred by PWC pursuant to Schedule 2, Schedule 3, Schedule 5, and Schedule 6 of the OATT that are provided from DEP’s generation resources.

**MONTHLY RATE**

The Customer shall pay monthly a **Basic Facilities Charge**, a **Demand Charge**, and an **Energy Charge** for all metered kWh delivered to the Customer. The monthly **Demand Charge** shall be calculated using the following formula:

$$[(\text{System CP Demand} \times \text{CP Demand Charge}) + (\text{Customer Peak Demand} \times \text{Customer Peak Demand Charge})]$$

The Customer’s monthly **CP Demand Charge** (per kW) shall be calculated using the following formula:

$$\{[(\text{System CP Demand Cost-Ancillary Credits}) \times (1+\text{System Loss Factor})] + [(\text{Transmission Cost}) \times (1+ \text{System Loss Factor})]\}$$

**LARGE POWER SERVICE-COINCIDENT PEAK**  
(continued)

<b>Basic Facilities Charge*</b>	<b>\$319.00</b>
<b>CP Demand Charge</b>	<b>\$18.43 per kW</b>
<b>Customer Peak Demand Charge</b>	<b>\$3.20 per kW</b>
<b>Energy Charge</b> <b>For all kWh</b>	<b>\$ 0.04840 per kWh</b>

The System CP Demand, System CP Demand Cost and the Transmission Cost may be modified and/or trued up by DEP from time to time in accordance with the PSCA and OATT. The System Loss Factor may be modified or trued up from time to time in accordance with Federal regulation.

**PRIMARY DISCOUNT** A primary discount from the Customer Peak Demand Charge will be given where the Customer takes service directly from PWC's distribution lines of 7,200 volts or higher, but less than 66,000 volts, and the Customer owns, operates, and maintains the equipment normally provided by PWC. Primary discount will be given in the form of reduced Customer Peak Demand Charges as follows:

<b>Primary Discount</b>	<b>\$ 0.53 per kW</b>
-------------------------	-----------------------

**POWER SUPPLY ADJUSTMENT (PSA)** The Energy Charge is subject to a monthly power supply adjustment referred to as the PSA. The PSA shall be computed and applied to the CP Demand and/or Energy Charge based upon PWC's power supply adjustment annual true-up of energy purchased from DEP in accordance with the PSCA.

**COAL ASH RIDER** As specified in the Service Regulations and Charges, a monthly surcharge to recover the portion of Duke Energy Progress' cost of cleaning up coal ash that is allocated to PWC.

<b>Coal Ash Rider</b>	<b>\$58.82</b>
-----------------------	----------------

**PAYMENTS** All bills shall be paid in accordance with the terms of the Service Regulations and Charges.

**LARGE POWER SERVICE-COINCIDENT PEAK**

(continued)

**SPECIAL FACILITIES CHARGES** As specified in the Service Regulations and Charges, a monthly surcharge may be assessed for special facilities provided by PWC.

<b>Contract Private Lighting</b>	<b>\$4.00</b>
<b>Contract Street Lighting</b>	<b>\$4.00</b>

**TAX** Applicable North Carolina sales tax will apply.

\*An additional \$4.00 Community Street Lighting charge applies to each meter on this rate schedule.
