

RESIDENTIAL GRINDER PUMP GRANT PROGRAM

The Residential Grinder Pump Program is a reimbursement program for single family residential property owners, who are required to install a grinder pump in order to discharge waste water (sewer) from a residential property located in the Phase V sewer extension areas into the PWC's sanitary sewer system.

APPLICATION The following conditions must be satisfied in order for a residential property owner to be eligible to qualify for reimbursement under this program:

1. Gravity sewer must not be reasonably available to the residential property located in the Phase V sewer extension areas.
2. The residential property must require the installation of a grinder pump in order to discharge waste water (sewer) into PWC's sanitary sewer system.
3. The assessment on the residential property must not have been discounted or reduced in any manner.

GRANT AWARD PWC will award a one-time grant reimbursement up to \$4,200 to reimburse a residential property owner for the actual incurred cost of a grinder pump that is required to be installed in order the residential property in the Phase V sewer extension areas to be connected to PWC's sewer system. In order to receive the reimbursement grant, the residential property owner must furnish to PWC a completed plumbing inspection certificate and a paid invoice from the plumbing contractor identified on the plumbing permit as part of the grant request.

Grant requests shall be made to the Customer Programs Call Center Office at PWC Administration Building located at 955 Old Wilmington Road, Fayetteville, NC . (910-223-4600).
